

# Adobe Acrobat Pro

Adobe Acrobat Pro is a comprehensive software solution for creating, editing, converting, and managing PDF files. It is estimated that Adobe currently holds approximately 70-75% of the global market. This significant market share is largely due to its extensive features and integration with other Adobe software applications.

Even though Adobe Acrobat Pro is now move towards a subscription-based licenses, the licenses are easily managed by the administrator(s) and ensure that all staff members receive the latest and greatest software updates accordingly.

Once an Adobe Acrobat Pro license is assigned to a staff member, the staff member will receive an invitation e-mail to confirm e-mail address and create a password. It is recommended that staff members should create a password with 8+ characters with at least one capital, number and special character. For additional security, encourage staff members to change passwords once every 60-90 days.

Within the Adobe Acrobat Reader, please sign in the top right side of the APP. Once signed into the Adobe account, the Adobe Acrobat Pro features should be enabled, including PDF editing, and combining PDFs documents. (In event of technical issues, reach out to your IT staff members for additional support).

A Adobe Reference Guide, which covers various helpful topics, such as creating forms, combining files, converting files, and more can be found here: <https://helpx.adobe.com/in/acrobat/user-guide.html>. Additionally, [PDF Optimizer](#) tool offers a range of settings to reduce the size of PDF files efficiently.
